

INTERVIEW QUESTIONS
(with Grading Criteria)
Logistics Management Specialist GS-0346-9/11

1. Describe the computer systems and software products you have used in your current or previous employment and how you used them to carry out your daily responsibilities. How competent are you in their use? In addition, describe your experience with OIS-W/OIS-R/ROLMS.
2. Share examples of instances where you represented your organization in dealing with an outside agency in person or by phone and in writing during a difficult situation or circumstance. How did you deliver the information and how was it received? What was the end result?
3. Share an experience where you resolved a problem with a previously identified standard work process that necessitated your use of an alternate course(s) of action (thinking outside the box) which achieved the desired end state.
4. Describe the OCONUS transportation process for ordnance. Begin from the time an ordnance requisition is referred to a storage location and end with the ordnance receipt at the Port of Debarkation (POD). Include any considerations that could delay the shipment at the Port of Embarkation (POE).
